

Project Design Phase-I

Solution Architecture

Date	17 October 2022
Team ID	PN2022TMID09256
Project Name	Emerging Methods for Early Detection Fires

Solution Architecture:

A complicated process with numerous sub-processes, solution architecture connects business issues with technological solutions. Its objectives are to:

- Find the best technological solution to address current company issues.
- Explain to project stakeholders the structure, traits, behaviour, and other features of the software.
- Specify the features, stages of development, and requirements for the solution.
- Offer guidelines for how the solution is created, managed, and delivered.
